

FUTI WAVE MAKER AERATOR

Key Features:

- The blade rotation is drove by the floating body, it come into being a strong wave to spread to the surrounding, with the feature of covering a wide water surface, high efficiency.
- Promoting water exchange for upper water and bottom water, it is propitious to the deep water aeration.
- The float is integral molding with the material of High Density Polyethylene (HDPE), fastness and durable.
- Cast iron motor and reducer housing with stainless steel output shaft design suitable for seawater and freshwater culture.
- Ideally to installed in square or round pond where performance is better than 2 sets of impeller aerator, energy saving.
- Easy maintain and low maintenance cost.

Model	Power	Phase	Voltage	Hz	Oxygen Transfer (kg/h)	Power Efficiency (kg/kw-h)	20/40ft container
SW-0.9	1hp/900w	3Ø	415v	50Hz	≥1.17	≥1.30	70/140 sets
SW-1.5	2hp/1500w	3Ø	415v	50Hz	≥1.95	≥1.30	70/140 sets
