

What is AZOMITE®?

AZOMITE® is a natural feed additive and pond water supplement mined in Utah, USA. AZOMITE® typically contains a broad spectrum of over 70 minerals and trace elements and unlike any other geological deposit in the world. AZOMITE® carries an FDA GRAS classification, is listed for certified organic/ natural use by the Organic Materials Review Institute (OMRI), and is certified for Halal.

Benefits of AZOMITE®:

In fish and shrimp, accredited research and industrial trials report that AZOMITE® improves:

- Digestive enzymes & feed digestibility
- Feed Conversion Ratio
- Average Daily Lean Gain
- Shrimp carapace quality
- Resistance to pathogens
- Beneficial plankton in pond water

Uses of AZOMITE®:

- Increase average daily lean gain
- Improve FCR in fish, such as Tilapia, catfish and shrimp
- Improve performance in fish and shrimp
- Improve immune response
- Help fish contend with disease
- Increase reproduction & fertility
- Generate a stable algae bloom and to boost natural pond productivity
- Increase liveability and growth parameters under stress
- Have the ability to bind toxins

Feed Ration Guidelines- Aquatic:

Generally, the addition of AZOMITE® at 0.5% is suggested. Shrimp and tilapia studies using from 0.3% to 1.0% have all reported significant increase in weight gain.
